

Copyright Transfer Form

(To be signed and sent to SICE Administration Office upon acceptance)

Prior to the publication of the paper shown below in the *SICE Journal of Control, Measurement, and System Integration* (SICE JCMSI), we, the authors, have scrutinized all the items listed in the *Confirmation Form at Paper Publication* regarding copyright, intellectual property right, producers' liability, and engineering ethics, and confirmed that no problems should arise in these respects after the publication of the paper in its present form, and then transfer the copyright of the paper to the Society of Instrument and Control Engineers (SICE) under the Copyright Regulations of SICE. Should some issues, in spite of the above check by the authors, be alerted from the thirdparty after the publication of the paper with respect to the originality, validity and ethical side of the descriptions therein, similar aspects in the relevant research processes, as well as the like, then we will take every measure to resolve them with full responsibility of the authors.

Title of the Paper: _____

Full Names of the Authors and Their Affiliations:

Date: _____

The Society of Instrument and Control Engineers (SICE)

Confirmation Form at Paper Publication

Copyright Related Matters

- No writing has been published by now containing descriptions with essential similarity to the contents of the present paper or a portion of them, other than to such an extent permitted in the regulation defined in the Submission Guidelines, in whatever forms of publications or information media.
- Every description cited from published matters and/or information media is so manifested at the respective position, by giving the relevant references and/or clarifying the sources.
- No descriptions as well as figures and drawings infringe the copyrights of other published matters, authors and/or publishers.
- Regarding such descriptions for which reproduction is inevitable, written permission has been obtained for free reproduction from the the authors and/or publishers of the respective reproduction sources. Should reproduction charges be demanded, we, the authors, have already taken required formalities for the payment. Alternatively, the present paper contains no reproduction from other published matters.
- The contents of the present paper have never been submitted to any other publications, nor are they considered for publication in any forms of media other than one or those published by the Society of Instrument and Control Engineers.
- Those who have been involved in, and/or made contributions to the contents of the present paper to an essential extent are all contained in the authors, or otherwise permission has been obtained from those as to our writing the present paper. Alternatively, no such sort of permission is necessary regarding the contents of the paper.
- Consent has been obtained from proper persons with appropriate authority in authors' affiliations regarding the contents of the present paper. Alternatively, no such sort of permission is necessary.

Intellectual Property Right, Producers' Liability, and Engineering Ethics Related Matters

- No criticism without academic grounds is directed to existing methods, techniques and products in the relevant descriptions. No pertinent descriptions can be misconceived as reproach, denunciation, accusation and/or defamation.
- The descriptions regarding the evaluation of existing methods, techniques and products are based upon entire academic grounds. Alternatively, no such descriptions are in the present paper.
- All the members of the relevant joint research have approved the descriptions pertinent to the joint research work. Alternatively, no such descriptions are in the present paper.
- No photos, patterns and the like infringe the portrait rights, industrial design rights and such of any thirdparties.
- The descriptions are based upon objective facts or established theories and/or views, and the references indispensable for supporting the facts, theories and views are all cited in the present paper.
- No terminologies and descriptions in the present paper are meant to be, nor should they be misconceived, as discrimination.
- As to the descriptions involving human beings as the main or partial research objects, the relevant research has been conducted under the approval of ethical inspection committees or some equivalents established in the organizations the authors are affiliated with and/or they conducted the relevant research work in. Otherwise, the relevant research activities are within the scope that requires no such approval, but are conducted by observing the spirit of the Declaration of Helsinki and thus under the informed consent obtained from the object persons together with adequate environment respecting their human rights and hence ensuring the objectiveness the research work. Furthermore, such circumstances have been stated clearly in the present paper. Alternatively, either no account to and concern on the object persons are requisite at all, or otherwise no descriptions at all involving human beings as the main or partial research objects are in the present paper.
- Throughout the research process and the writing process of the present paper, together with in its present descriptions, full attention is paid on the Act on the Protection of Personal Information and other various laws and ordinances, as well as other standards and regulations to be applied, and thus they have never been interfered with at all. Furthermore, the present paper should never cause any problems with respect to socially accepted ideas.
